

DD350

DD350 forks are suitable for both large and thin double deep forks.

Slides are 350 mm wide and their total thickness is equal to 120 mm.

The minimum length of this fork is about 1500 mm and it can handle up to 1500 kg. As usual this value is influenced by the stroke/length ratio.

Each fork can be customized based on Customer's needs.

DD350 products are covered by international patent.

Code	Width	Height SD	Height DD
DD350X90X120	350 mm	120 mm	120 mm

SD: Single Deep

DD: Double Deep

Highlights

- High reliability and positioning accuracy
- Small vertical size
- Reduced deflection value
- Easy maintenance activity
- Close pallet handling
- Completely customizable

Typical application

- AS/RS
- Transfer station

Additions

- Chain Conveyor
- Lift system
