

SD370

Code	Width	Height
SD370X180	370 mm	180 mm

The continuous market demand to increase loads, weight, dimensions and, at the same time, to reduce the deflection values, has driven Eurofork to constantly innovate its range of products. SD370 fork, with its huge inertia and large diameter of the cam-followers, is able to handle 7000 kg with a very reduced deflection. Eurofork has also succeed in satisfying the big load handling requirements: more than 4 meters long telescopic forks has been produced to handle such loads with an high stability.

Each fork can be customized based on Customer's needs.

SD370 products are covered by international patent.

Highlights

- High reliability and positioning accuracy
- Heavy loads handling
- Reduced deflection value
- Easy maintenance activity
- Common spare parts for SD fork type
- Completely customizable

Typical application

- AS/RS
- Aerospace
- Coils
- Transfer station

Additions

- Chain Conveyor
- Lift system
- Variable Fork to Fork distance
